

BPC-157

Body Protection Compound 157

The Master Healer

WHAT IS BPC-157?

BPC-157 (Body Protection Compound-157) is a synthetic peptide derived from a protein naturally found in human gastric juice. It consists of 15 amino acids and has been extensively studied for its remarkable regenerative and healing properties. Unlike many compounds, BPC-157 is stable in both acidic and neutral environments, allowing it to work throughout the body.

KEY BENEFITS

- Accelerates healing of tendons, ligaments, muscles, and bone
- Reduces inflammation and pain throughout the body
- Supports gut health and repairs intestinal lining (leaky gut)
- Promotes angiogenesis (new blood vessel formation) to speed recovery
- Protects and regenerates nerve tissue
- Enhances wound healing and scar reduction
- Supports joint health and reduces arthritis symptoms
- May improve mood and reduce anxiety via dopamine modulation

HOW IT WORKS

BPC-157 accelerates healing by upregulating growth factors including VEGF (vascular endothelial growth factor), which triggers the formation of new blood vessels. It activates the nitric oxide system, reducing inflammation and improving blood flow to damaged tissues. It also enhances the expression of collagen genes, directly rebuilding connective tissue at the cellular level.

WHY IT'S PAIRED WITH OTHER PEPTIDES

BPC-157 works synergistically with TB-500 to provide comprehensive tissue repair. While BPC-157 focuses on localized healing and gut repair, TB-500 promotes systemic cell migration and flexibility throughout the body. Together, they cover both local and systemic recovery — making this combination the gold standard in regenerative peptide therapy.

FAST FACTS

Class Regenerative / Healing Peptide	Origin Derived from gastric protein
Administration Subcutaneous injection	Typical Duration 3-month protocol

PRICING

BPC-157 — 3 Month Supply

Part of Body Repair & Wolverine Packages

Included

Dispensed via Telemedicine | Physician Supervised | Ask Us About Package Pricing
