

# Sermorelin

*Growth Hormone Releasing Hormone Analog*

Restore Youth | Build Muscle | Burn Fat | Sleep Deep

## WHAT IS SERMORELIN?

---

Sermorelin is a synthetic analog of Growth Hormone Releasing Hormone (GHRH) — a peptide naturally produced in the hypothalamus that signals the pituitary gland to release Human Growth Hormone (HGH). Unlike direct HGH therapy, Sermorelin stimulates the body's own production of growth hormone in a natural, pulsatile pattern, making it safer, more physiological, and legally prescribable through telemedicine. It is the premier anti-aging peptide for adults experiencing age-related decline in growth hormone.

## KEY BENEFITS

---

- Increases natural Human Growth Hormone (HGH) production
- Promotes lean muscle mass development and strength gains
- Accelerates fat loss, especially visceral (belly) fat
- Dramatically improves sleep quality and recovery
- Enhances skin thickness, texture, and reduces wrinkles
- Boosts energy levels, libido, and sense of well-being
- Supports bone density and reduces fracture risk
- Improves cognitive function and memory
- Supports immune system function

## HOW IT WORKS

---

Sermorelin binds to GHRH receptors in the pituitary gland, triggering the natural, pulsatile release of Growth Hormone. This mimics the body's youthful HGH secretion pattern — the kind you had in your 20s. Growth hormone then acts on the liver to produce IGF-1 (Insulin-like Growth Factor), which is responsible for most of GH's tissue-building, fat-burning, and rejuvenating effects.

## WHY IT'S A POWERFUL ADD-ON

---

Sermorelin synergizes powerfully with the Body Repair Package. BPC-157 and TB-500 accelerate localized healing; Sermorelin provides the systemic anabolic environment needed to rebuild and regenerate throughout the body. Adding Sermorelin creates a full regenerative ecosystem — repair, rebuild, and rejuvenate simultaneously.

## FAST FACTS

---

<b>Class</b> Growth Hormone Secretagogue	<b>Origin</b> Synthetic GHRH analog
<b>Administration</b>	<b>Typical Duration</b>

Subcutaneous injection (nightly)

9-week protocol

## PRICING
