

Tirzepatide

Dual GIP/GLP-1 Receptor Agonist

Next-Generation Weight Loss & Metabolic Reset

WHAT IS TIRZEPATIDE?

Tirzepatide is the most advanced weight loss medication available today — a first-in-class dual GIP (glucose-dependent insulintropic polypeptide) and GLP-1 receptor agonist. Unlike single-pathway GLP-1 medications, Tirzepatide targets two hormonal pathways simultaneously, producing superior weight loss results. Clinical trials have shown average weight loss of 20-22% of total body weight — results previously only seen with bariatric surgery.

KEY BENEFITS

- Clinically proven 20-22% average total body weight loss
- Dual-action: targets both GIP and GLP-1 receptors simultaneously
- Reduces appetite and food cravings dramatically
- Improves insulin sensitivity and blood sugar control
- Lowers triglycerides and improves cardiovascular markers
- Reduces inflammation associated with obesity
- Improves blood pressure and metabolic syndrome markers
- Once-weekly injection — maximum convenience

HOW IT WORKS

Tirzepatide works by activating two key hormones involved in metabolic regulation. GLP-1 slows gastric emptying and reduces appetite by signaling the brain's satiety centers. GIP enhances insulin secretion and plays a crucial role in fat metabolism. Together, these dual pathways create a profound metabolic shift — patients feel full sooner, eat less, and burn stored fat more efficiently.

WHY IT'S PAIRED WITH THE BODY REPAIR PACKAGE

Rapid weight loss can come with side effects: muscle loss, fatigue, nutrient deficiencies, and skin laxity. The Body Repair Package (BPC-157 + TB-500 + MOTS-C) directly addresses these concerns. MOTS-C preserves metabolic function and prevents muscle wasting, while BPC-157 and TB-500 support tissue health during rapid body recomposition. This combination delivers the full transformation — not just weight loss, but body optimization.

FAST FACTS

Class Dual GIP/GLP-1 Agonist	Average Weight Loss 20-22% body weight
Administration Weekly subcutaneous injection	Typical Duration 3-month starter protocol

PRICING

Tirzepatide Only — 3 Month Supply	\$910
Tirzepatide + Body Repair Package — 3 Months <i>Includes BPC-157, TB-500 & MOTS-C \$274/mo per component</i>	\$1,730
